

Sola CURE

Sola-Cure anti-glare marine window blinds are Lloyd's Type approved solar screens that fully comply with SOLAS regulations as well as ISO 8468:2007.

Primarily designed for all types of vessels in the maritime industry to reduce glare and heat from bridge windows, they are also perfect for air traffic control towers, vessel control towers and crane cabs to name a few applications.

Sola-Cure anti-glare blinds improve safety and enhance working conditions.

View our full range of window blind products visit www.sola-cure.com . For all your needs we've got it covered.

Sola-Cure.com are suppliers of anti-glare, UV protection roller solar shades for the maritime industry. Our high quality marine blinds are approved and suitable for all size and shape of window. Use our on-line product identification form to select the exact blind for your requirement.

ISO8468:2007 Ships and Marine Technology – Ship's bridge layout and associated equipment – Requirements and guidelines.

“To ensure a clear view in bright sunshine, sunscreens with minimum colour distortion should be provided at all windows in front of workstations. Such screens should be readily removable and not permanently installed.”

Sola-Cure is committed to supplying the highest quality products and has implemented what we believe to be the most stringent of quality assurance processes. Our marine blinds are made up of a high quality aluminium cassette and polymer film. Other suppliers quote their film performance data

from calculations only, choosing not to conduct actual testing of the films. Sola-Cure has in place a third party UKAS approved physical testing procedure which compares the calculated data with the actual performance of our shade films.

When deciding who should supply your UV protection marine blinds, we encourage you to ask for copies of these test results. At Sola-Cure, we are happy to supply our clients with copies of the test certificates together with the calculated performance data.

Features

- **Glare Reduction**
- **Over 99% UV Protection**
- **Excellent solar energy rejection**
- **Shades available in Gold, Silver, Bronze and Grey**
- **Suitable for Inclined, Declined and Overhead windows**
- **Choice of operating and locking mechanisms**
- **Suitable for restricted spaces**
