

MX Deck Rails - electrically operated

High quality deck rails designed for all kind of environments.
An electrically operated deck rail increases the comfort and has integrated cable guiding.
MX deck rails have more space to allow a larger number of cables.

Heavy equipped

- Manufactured of anodized aluminium with a center slot for cables
- Electrically operated
- Large space for cables

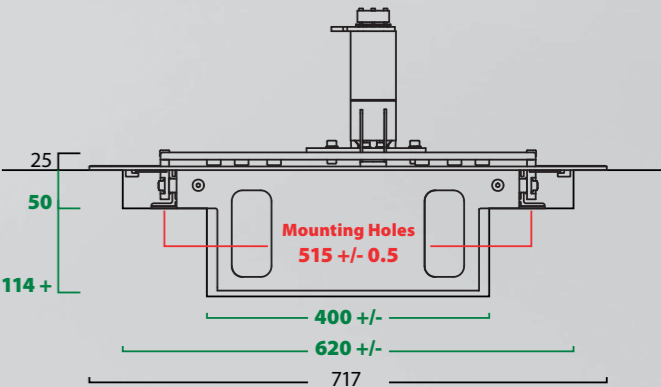

The deck rails are fitted with electrical adjustment, slot and conveyer for cables. Deck rails for the NorSap 2500 and 3500 series are not suitable for manual travel due to the larger chair models. The deck rails is controlled thru a control panel in the chairs armrest. Alternatively the control of the deck rail can be integrated in the customers PLS system or other custom controlling equipment.

The deep MX electrical deck rails fits the following models
NorSap 2500, 3500 and MX series only.

| Article number and Description | |
|--|---|
| 6675-1500 | 1500 mm electrically driven MX deck rail |
| 6675-2000 | 2000 mm |
| 6675-2500 | 2500 mm |
| 6675-3000 | 3000 mm |
| For electrically operated deck rails an additional power supply of 24V 20A DC is required, not included. | |
| 6910 | 24V Universal AC input / Full range (115V/230V) |

MX deck rail

Flush mounted MX Deck Rail
