- Horizontal glide rails
- Friction free swivel turn with lock
- Spring loaded flip back armrests
- Fully reclining backrest
- Compact and easy to use
- Comfortable and durable
- Optimised design concept
- Ergonomic comfort

Human factors & Environment

Combined with over 15 years' experience in seating, NorSap chairs are designed for a worldwide user, from the smaller 1% to the largest 99% user. Our design philosophy is to keep seating varied, both for different users and seating positions - from a relaxed position to an alert working posture.

The NorSap 1100 is designed to follow modern ergonomic requirements for maritime chairs in its class, and will give the user comfort and flexibility.

Ergonomic adjustments are made using polished stainless steel handles placed within easy reach:

- Full range of back support inclination
- Forwards and backwards seat adjustment
- Seat height / footrest height fully adjustable
- Full swivel with locking handle

Armrests have a heavy-duty flip mechanism to create easy user entry/exit, and can handle heavy controls.

Flip up armrests

NorSap 1100 offer room for movement and variation.

Reclining backrest

5090	NorSap 1100 chair top no column with swivel	

The chair is a long-life design. Modular construction allows back cushions, seat assembly, arms and lumbar support to be added, changed or replaced at any time.

Upholstery, embroidery and colours

You may choose from our standard colours and upholstery combinations. There are several choices of fabric and leather/perforated leather combinations. You may also choose which colour the contrast seam is stitched in, giving you the ability to personalize the look of the chair.
